The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial services to car buyers. The skyrocketing price of gas spurs developments in hybrid technology and clean diesel, as manufacturers look for ways to improve fuel efficiency. Meanwhile, all of the biggest, most successful firms have become totally global in nature. Plunkett's Aut the car dealership side, giant, nationwide holding companies have acquired the best dealers in major markets. Even the used car business is being taken over by national chains. E-commerce is having profound effects on the car industry. Consumers use the Internet to become better informed before making a purchase. Online sites like Autobytel steer millions of car buyers toward specific dealers while the same sites deliver competing bids for cars, insurance and financing in a manner that lowers costs and improves satisfaction among consumers. Meanwhile,

A behind-the-scenes look at Lexus's surprising twenty-year success story—in a revised new edition In the 1980s, German brands BMW and Mercedes-Benz dominated the luxury car market and had little reason to fear competition from Japan. But in 1989, Toyota entered the market with the Lexus LS 400, a car that could compete with the Germans in every category but price—it was US\$30,000 cheaper. Within two years, Lexus had overtaken Mercedes-Benz in the United States and made a stunning success of Toyota's brave foray into the global luxury market. Lexus: The Relentless Pursuit reveals why Toyota decided to take on the German automakers and how the new brand won praise and success for its unparalleled quality, unforgettable advertising, and unprecedented customer service. From the first boardroom planning session to Lexus's entry into the mega-luxury supercar market, this is the complete and compelling story of one of the world's most admired brands. Includes a new Foreword by legendary designer Erwin Lui, an Afterword with updates since the first edition, and a new Coda by leading Japanese automotive journalist Hisao Inoue Covers the racetrack triumph—and tragedy—behind the new US\$375,000 Lexus LFA supercar Offers important business lessons for brand managers and executives For car enthusiasts, business leaders, and anyone interested in branding and marketing, Lexus: The Relentless Pursuit offers an amazing story of excellence and innovation in the automotive industry.

This book summarizes the "interim result" of the servitization activities in manufacturing industries. While the early literature on servitization tended to stress only its advantages, more recently, scholars have also started to refer to the challenges associated with servitization. This book attempts to give a balanced picture of servitization. The book is structured in four parts: Part I introduces the topic by presenting the most recent academic discussion about servitization and uses an empirical analysis to show the d literature. This comparison highlights the existing discrepancies between the rather euphoric literature and the more skeptical practical experience. The second and third parts attempt to explain these discrepancies by taking as a starting point the assumption that servitization recommendations have to consider the heterogeneity of the manufacturing sector and the capabilities of the provider. Part II presents articles which analyze the specific characteristics of different sectors with their barriers and potentials and which include, e.g. aeronautics, automotive, ICT, chemical industries, pulp and paper industries and different engineering sectors. Part III focuses on companies' capabilities which are necessary for successful servitization. These include strategic management, marketing, organization, innovation, engineering, human resources, controlling, quality and networks. All the contributions in parts II and III add up to a detailed picture of servitization for sectors and functions and indicate the practical implications for enterprises in findings and giving an outlook of servitization in manufacturing industries, its challenges and future developments.

Franklin, Jack, Maria, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now!) Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoules. It all comes down to whether an a and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

Provides information on the truck and specialty vehicles business, including: automotive industry trends and market research; mergers, acquisitions, globalization; automobile manufacturers; truck makers; makers of specialty vehicles such as RVs; automobile loans, insurance and other financial services; dealerships; and components manufacturers.

BRI and International Cooperation in Industrial Capacity

For the first time in one volume, Phil Edmonston, Canada's automotive "Dr. Phil," covers all used vehicles, packing this guide with insider tips to help the consumer make the safest and cheapest choice possible from cars and trucks of the past 25 years.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

BRI and International Cooperation in Industrial Capacity: Country Cooperation Guide provides research reports on international production capacity and equipment-manufacturing cooperation of major countries, offering a better understanding of the destination country's information and its market trend, facilitating decision-making for both domestic and foreign investors.

Plunkett's InfoTech Industry Almanac presents a complete analysis of the technology business, including the convergence of hardware, software, entertainment and telecommunications. This market research tool includes our analysis of the major trends affecting the industry, from the soaring need for memory, to supercomputing, open source systems such as Linux, cloud computing and the role of nanotechnology in computers. In addition, we provide major statistical tables covering the industry, from computer sector revenues to broadband subscribers to semiconductor industry production. No other source provides this book's easy-to-understand comparisons of growth, expenditures, technologies, imports/exports, corporations, research and other vital subjects. The corporate profile section provides in-depth, one-page profiles on each of the top 500 InfoTech companies. We have used our massive databases to provide you with unique, objective analysis of the largest and most exciting companies in: Computer Hardware, Computer Software, Internet Services, E-Commerce, Networking, Semiconductors, Memory, Storage, Information Management and Data Processing. We've been working harder than ever to gather data on all the latest trends in information technology. Our research effort includes an exhaustive study of new technologies and discussions with experts at dozens of innovative tech companies. Almost Everything You Need to Know About Leading the Good Life Too many decisions. Too many choices. What today's smart consumer must have is a money-and-time-saving guide for conducting the "business of life"—both the big challenges, such as getting top-notch health care for the family and the best education for the kids, and the pleasurable ones, like plotting the family summer vacation. Nancy Keates and her expert colleagues at The Wall Street Journal provide all-new material that gives the lowdown on: The Savvy Traveler: How to cut to the chase and not only avoid the indignity of cramped plane seats and overpriced tickets, but also get the best and safest seats at the same time. The Fine Art of Dining and Drinking: Landing the hottest table in town—at a discount; picking wine without becoming a wine snob; and learning about "barley matters"—the newest, hottest beers. How to Speak Geek: Demystifying tech trends, with smart advice on not only what high-tech gadgets to buy but how to shop for them. Everything You Need to Know About Buying, Selling and Financing a Car: How to get the best and safest vehicle at the best price. Real Estate: Will the bubble burst? Here's how to be an informed buyer and seller along with the basics of remodeling and designing your home. How to Be an Informed Patient: Choosing a hospital, playing private investigator with your M.D., and learning about the tests you really ought to have (even if you have to pay for them yourself). Getting Real Bang for Your Education Bucks: What you need to know from preschool through college and graduate school. The Great Balancing Act: Managing work and family, and finding out how to avoid the overstretched child and parent syndromes. Financing Your Life: It was easy in the 1990s, but the world has changed dramatically. Here's how to deal with the new world of saving, investing and borrowing money. Shopping: The New Sex? Throw away your Kama Sutra. The number one thrill in shopping is getting a good deal—here's how to play the game and get the best stuff at the best price. The Wall Street Journal Guide to the Business of Life is both an instruction manual for living life to the fullest and a fun read about what really matters in the day-to-day. It has all the basic insight and information you need to navigate through life along with hilarious side trips such as "The Three-Decorator Experience" and "Cruises: Sailing New Waters."

No other guide covers the complete retail picture like this exciting new volume. America's retail industry is in the midst of vast changes – superstores and giant discounters are popping up on major corners. Malls are lagging while "power centers" are surging ahead. Savvy firms are combining bricks, clicks and catalogs into multi-channel retail powerhouses. Which are the hottest retailers? What lies ahead? Our market research section shows you the trends and a thorough analysis of retail technologies, chain stores, shopping centers, mergers, finances and future growth within the industry. Included are major statistical tables showing everything from monthly U.S. retail sales, by sector, to mall sales per square foot, to the 10 largest malls in the US. Meanwhile, the corporate profiles section covering nearly 500 firms gives you complete profiles of the leading, fastest growing retail chains across the nation. From Wal-Mart and Costco to Barnes & Noble and Amazon, we profile the major companies that marketing executives, investors and job seekers most want to know about. These profiles include corporate name, address, phone, fax, web site, growth plans, competitive advantage, financial histories and up to 27 executive contacts by title. Purchasers of the printed book or PDF version may receive a free CD-ROM database of the corporate profiles, enabling export of vital corporate data for mail merge and other uses.

The adviser to Senator Hillary Clinton, Bill Gates, and President Bill Clinton proves that small is big by identifying 75 hidden-in-plain-sight trends that are moving America, revealing that the nation is no longer a melting pot but a collection of communities with many individual tastes and lifestyles. "The ideas in his book will help you see the world in a new way." –Bill Clinton "Mark Penn has a keen mind and a fascinating sense of what makes America tick, and you see it on every page of Microtrends." –Bill Gates In 1982, readers discovered Megatrends. In 2000, The Tipping Point entered the lexicon. Now, in Microtrends, one of the most respected and sought-after analysts in the world articulates a new way of understanding how we live. Mark Penn, the man who identified "Soccer Moms" as a crucial constituency in President Clinton's 1996 reelection campaign, is known for his ability to detect relatively small patterns of behavior in our culture-microtrends that are wielding great influence on business, politics, and our personal lives. Only one percent of the public, or three million people, is enough to launch a business or social movement. Relying on some of the best data available, Penn identifies more than 70 microtrends in religion, leisure, politics, and family life that are changing the way we live. Among them: People are retiring but continuing to work. Teens are turning to knitting. Geeks are becoming the most sociable people around. Women are driving technology. Dads are older than ever and spending more time with their kids than in the past. You have to look at and interpret data to know what's going on, and that conventional wisdom is almost always wrong and outdated. The nation is no longer a melting pot. We are a collection of communities with many individual tastes and lifestyles. Those who recognize these emerging groups will prosper. Penn shows readers how to identify the microtrends that can transform a business enterprise, tip an election, spark a movement, or change your life. In today's world, small groups can have the biggest impact.
